Experience

Snowflake **Toronto, Canada**
Senior Manager of Product Management *October 2024 - Present*

- Led Snowflake App Runtime from zero to GA in 2026: named and priced it, launched it in the Summit keynote, and shipped GA by September; it now serves thousands of users across hundreds of customer accounts.
- Lead the Developer Platform, the drivers, CLIs, APIs, and Git and Terraform tooling behind billions in annual revenue. Built its PM team and gave eight separate products shared goals for the first time.
- Sponsored a full replatform of all seven Snowflake language drivers onto one shared Rust core: wrote the business case, won leadership support, and ran customer early access, with the first drivers now GA.
- Through that team, built an SDLC for Snowflake around Database Change Management, which turns an account's configuration into version-controlled code with a dry run before every deployment. Built on Snowflake CLI and CI/CD integrations, it brings GitOps to data infrastructure and gives coding agents a safe way to make real changes.

GitHub **Toronto, Canada**
Staff Product Manager, Open Source → Director of Product Management *June 2020 - September 2024*

- Joined as Staff PM to lead npm's integration into GitHub; became DRI for supply chain security, driving response across engineering, policy, and legal through a wave of account takeovers and a registry breach.
- Enforced mandatory 2FA for npm's highest-impact maintainers, achieving 90%+ adoption across the top 500 packages.
- Promoted to Director; shipped build provenance via Sigstore, later adopted across other language ecosystem registries; expanded scope to Codespaces and drove it to profitability.

Google **New York City, New York**
Developer Advocate → Staff Developer Advocate, L4 to L6 in three years *January 2017 - June 2020*

- Took Top-Level Await from proposal to TC39 Stage 3, building consensus across browser vendors over 18 months.
- Co-founded OpenJS Foundation by chairing merger negotiations between Node.js and JS Foundations.
- Founded and chaired the ES Modules working group: 42 participants across 10 corporations and 3 standards bodies.
- Shipped ES Modules to Node.js, writing core implementation code; co-authored the JavaScript IETF mimetype specification.

IBM **San Francisco, California**
Advisory Software Engineer, Open Technology *October 2015 - January 2017*

- Ramped from new contributor to leading the Release and LTS process for Node.js core.
- Built a smoke testing suite still used for every Node.js release.

Open Source and Standards

ECMA International
TC39 Delegate | Co-Chair (2020) | ECMA Vice-President (2019-2020) *2017 - 2024*

OpenJS Foundation
Board Member: Vice Chair (2019-2020), Platinum/Silver Director *2019 - 2022*

Node.js
Technical Steering Committee Member *2017 - 2022*

Education

Stanford University **Stanford, California**
MA/MST, Masters of Music Science and Technology *September 2012 - April 2014*

OCAD University **Toronto, Ontario**
BFA, Integrated Media with minor in Digital Media Studies *September 2009 - June 2012*
